Journal of Alloys and Compounds 289 (1999) 313–317

Journal of ALLOYS AND COMPOUNDS

Subject Index of Volume 289

Ab initio calculations
high-pressure study of titanium carbide 24
Absorption capacities and rate
hydrogen isotope absorption in $Zr(Mn_{0.5}Fe_{0.5})_2$ 306
Al–Co alloys
melting zone technique as a tool for a combinatorial approach in material science. I. Application to Al–Co alloys 185
Al–Co–Fe alloys
melting zone technique as a tool for a combinatorial approach in material science. I. Application to Al–Co alloys 185
Al–Cu–Ni–Zr
thermodynamics of liquid Al–Ni–Zr and Al–Cu–Ni–Zr alloys 152
Al–Li alloy
δ' precipitation in Al–9.7at%Li alloy using small-angle X-ray scattering 81
Atomic parameter–pattern recognition method
regularities of formation of ternary intermetallic compounds. Part 2. Ternary compounds between transition elements 126

Barkhausen effect
spinning phenomena, structure and magnetic properties of Fe–6.5 mass% Si alloy fiber produced by the in-rotating-liquid-spinning process 220
BCC alloys
hydrogen storage characteristics of Ti–Zr–Cr–V alloys 244
Binary systems
study of the Ag–In–Te ternary system 99

Calorimetry
the enthalpy of formation and the heat capacity of liquid Cu–La–Ni alloys 145
thermodynamics of liquid Al–Ni–Zr and Al–Cu–Ni–Zr alloys 152
Cathodic charging
highly oriented hexagonal hydride phase formation in single phase Ti_3Al by cathodic charging L1
Chevrel phases
superconducting properties of solid solutions $(Mo_6Se_8)Pb_x$ and $Pb_xMo_6Se_8$ in the ternary system Pb–Mo–Se 260
Compressibility
high-pressure study of titanium carbide 24
Co–Pr–Si phase diagram
isothermal section of the phase diagram of the ternary system Co–Pr–Si at 500°C 178
Criterion of formation
regularities of formation of ternary intermetallic compounds. Part 2. Ternary compounds between transition elements 126
Crystal field parameter
crystal and exchange fields in $SmCo_5$ studied by inelastic neutron scattering 28
Crystal structure
new ternary compounds with CeFeSi-type structure (LuTiSi, LuTiGe) and CeScSi-type structure (ZrVGe and HfVGe) L10
crystal structure of the heavy-fermion compound UCu_5Sn 32
synthesis and high temperature X-ray diffraction studies on the perovskite $SrLaMnRuO_6$ 42
phase composition and crystal structure of $(La_{2-y}Nd_y)_{1-x/2}Sr_{1+x}Cu_2O_6$ ($0 \leq x \leq 1$; $0 \leq y \leq 2$) 48
phase equilibria in the ternary system Pr–Co–B 96
new ordered $ThSi_2$-type derivatives in the light rare earths germanides. Crystal structure of Nd_4Ge_7 168
structure and electrochemical properties of $LaCo_{13-x}Ni_x$ compounds 251
Crystal structure determination
hexagonal Y_3Ge_5 with a new AlB_2 derivative structure 116
Cu–La–Ni
the enthalpy of formation and the heat capacity of liquid Cu–La–Ni alloys 145
Cu–La system
thermodynamic assessment of the Cu–La system 88
Curie temperature
magnetovolume properties of $Y_2Fe_{17-x}M_x$ alloys (M=Si or Al) 18

Dental alloys
X-ray diffraction and microstructural study of PFM precious metal dental alloys under different metallurgical conditions 289
Deuterium
hydrogen isotope absorption in $Zr(Mn_{0.5}Fe_{0.5})_2$ 306
Dislocation pileup
dislocation pileups in nanocrystalline materials 285
Doping effects
superconducting properties of solid solutions $(Mo_6Se_8)Pb_x$ and $Pb_xMo_6Se_8$ in the ternary system Pb–Mo–Se 260

Electrical conductivity
phase equilibria, and electrical properties of compounds in the system $MgO–La_2O_3–TiO_2$ at 1200°C 257
Electrochemical properties
high energy ball milling of $(Zr,La)(V,Ni)_{2.25}$ under hydrogen L6
Electron delocalization
mechanochemical synthesis of ferroferriborate (vonsenite, Fe_3BO_5) and magnesium ferroferriborate (ludwigite, Fe_2MgBO_5) 55
Electronic structure calculations
theoretical study of the structural properties and thermodynamic stability of the omega phase in the 4d-transition series 1
Enthalpy change
the thermodynamic parameters for the $LaNi_{5-x}Al_x–H_2$ and $MmNi_{5-x}Al_x–H_2$ systems 207
Enthalpy of formation
the enthalpy of formation and the heat capacity of liquid Cu–La–Ni alloys 145
Enthalpy of mixing
thermodynamics of liquid Al–Ni–Zr and Al–Cu–Ni–Zr alloys 152

Elsevier Science S.A.
PII: S0925-8388(99)00267-4

Entropy change
the thermodynamic parameters for the $LaNi_{5-x}Al_x$–H_2 and $MmNi_{5-x}Al_x$–H_2 systems 207
Eu–O luminescence
localization of Eu^{3+} in $KGd_{1.9}Eu_{0.1}F_7$ and $KGd_{1.9}Eu_{0.1}F_{6.97}O_{0.015}$ by site-selective excitation and time-resolved spectroscopy 71
Eu^{3+}: KGd_2F_7
localization of Eu^{3+} in $KGd_{1.9}Eu_{0.1}F_7$ and $KGd_{1.9}Eu_{0.1}F_{6.97}O_{0.015}$ by site-selective excitation and time-resolved spectroscopy 71
Excess entropy
thermodynamics of liquid Al–Ni–Zr and Al–Cu–Ni–Zr alloys 152
Exchange field
crystal and exchange fields in $SmCo_5$ studied by inelastic neutron scattering 28

Fe–Cu–B alloys
nanostructure and phase distributions in $(Cu_{0.80}Fe_{0.20})_{100-x}B_x$ melt spun ribbons studied by Mössbauer spectroscopy 270
Fe–Si alloys
spinning phenomena, structure and magnetic properties of Fe–6.5 mass% Si alloy fiber produced by the in-rotating-liquid-spinning process 220
production process of grain orientation-controlled Fe–6.5 mass% Si alloy fiber using spinning in gas atmosphere followed by winding in rotating liquid 277
Fluoride
localization of Eu^{3+} in $KGd_{1.9}Eu_{0.1}F_7$ and $KGd_{1.9}Eu_{0.1}F_{6.97}O_{0.015}$ by site-selective excitation and time-resolved spectroscopy 71
Formation criteria
regularities of formation of ternary intermetallic compounds. Part 1. Ternary intermetallic compounds between nontransition elements 120
regularities of formation of ternary intermetallic compounds. Part 3. Ternary compounds between one nontransition element and two transition elements 131

Gas quenching
production process of grain orientation-controlled Fe–6.5 mass% Si alloy fiber using spinning in gas atmosphere followed by winding in rotating liquid 277
Gibbs energy
thermodynamics of liquid Al–Ni–Zr and Al–Cu–Ni–Zr alloys 152
Grain boundary
dislocation pileups in nanocrystalline materials 285

HDDR
gaseous interactions with Sm–Fe and Sm–Fe–Ta intermetallic alloys 213
bonded Sm–Fe–(Ta)–N materials produced via attritor milling and HDDR 265
Heat capacity
the enthalpy of formation and the heat capacity of liquid Cu–La–Ni alloys 145
Heat treatment
hydrogen storage characteristics of Ti–Zr–Cr–V alloys 244
X-ray diffraction and microstructural study of PFM precious metal dental alloys under different metallurgical conditions 289
Hexagonal hydride
highly oriented hexagonal hydride phase formation in single phase Ti_3Al by cathodic charging L1
Hg–Te–In–Ga alloys
phase diagrams of II–VI/III–VI solid solutions with ordering tendencies 233
High energy ball milling
high energy ball milling of $(Zr,La)(V,Ni)_{2.25}$ under hydrogen L6
High pressure
magnetovolume properties of $Y_2Fe_{17-x}M_x$ alloys (M=Si or Al) 18
Hydride
gaseous interactions with Sm–Fe and Sm–Fe–Ta intermetallic alloys 213
Hydriding properties
the thermodynamic parameters for the $LaNi_{5-x}Al_x$–H_2 and $MmNi_{5-x}Al_x$–H_2 systems 207
Hydrogen
hydrogen isotope absorption in $Zr(Mn_{0.5}Fe_{0.5})_2$ 306
Hydrogen in metals
the thermodynamic parameters for the $LaNi_{5-x}Al_x$–H_2 and $MmNi_{5-x}Al_x$–H_2 systems 207
Hydrogen storage alloy
hydrogen behavior in the La–Mg–Cu system 66
Hydrogen storage alloys
hydrogen storage characteristics of Ti–Zr–Cr–V alloys 244
studies on cobalt-free AB_5-type hydrogen storage alloys 299
Hydrogen storage material
structure and electrochemical properties of $LaCo_{13-x}Ni_x$ compounds 251

Inelastic neutron scattering
crystal and exchange fields in $SmCo_5$ studied by inelastic neutron scattering 28
In situ measurements
a Mössbauer effect investigation of the Li–Sn system 135
In situ X-ray diffraction
high-pressure study of titanium carbide 24
Intermetallic compound
crystal structure of the heavy-fermion compound UCu_5Sn 32
highly oriented hexagonal hydride phase formation in single phase Ti_3Al by cathodic charging L1
4d-intermetallics
theoretical study of the structural properties and thermodynamic stability of the omega phase in the 4d-transition series 1
Iron borates
mechanochemical synthesis of ferroferriborate (vonsenite, Fe_3BO_5) and magnesium ferroferriborate (ludwigite, Fe_2MgBO_5) 55
Iron sulfides
Mössbauer study of vacancies in natural pyrrhotite 36

$LaCo_{13}$-based compounds
structure and electrochemical properties of $LaCo_{13-x}Ni_x$ compounds 251
$(La_{2-y}Nd_y)_{1-x/2}Sr_{1+x}Cu_2O_6$
phase composition and crystal structure of $(La_{2-y}Nd_y)_{1-x/2}Sr_{1+x}Cu_2O_6$ ($0 \leqslant x \leqslant 1$; $0 \leqslant y \leqslant 2$) 48
La–Ni alloys
the thermodynamic parameters for the $LaNi_{5-x}Al_x$–H_2 and $MmNi_{5-x}Al_x$–H_2 systems 207
studies on cobalt-free AB_5-type hydrogen storage alloys 299
Li–Ni intermetallic compounds
a Mössbauer effect investigation of the Li–Sn system 135
Liquid alloys
the enthalpy of formation and the heat capacity of liquid Cu–La–Ni alloys 145
Liquid–liquid miscibility gap
study of the Ag–In–Te ternary system 99
Liquid–solid equilibria
study of the Ag–In–Te ternary system 99
Li–Sn alloys
a Mössbauer effect investigation of the Li–Sn system 135
Local probe
localization of Eu^{3+} in $KGd_{1.9}Eu_{0.1}F_7$ and $KGd_{1.9}Eu_{0.1}F_{6.97}O_{0.015}$ by site-selective excitation and time-resolved spectroscopy 71

Magnesium based alloy
hydrogen behavior in the La–Mg–Cu system 66
Magnet
gaseous interactions with Sm–Fe and Sm–Fe–Ta intermetallic alloys 213
bonded Sm–Fe–(Ta)–N materials produced via attritor milling and HDDR 265
Magnetocrystalline anistropy
formation, structure and magnetic properties of $TbFe_{12-x}Nb_x$ compounds 228
Magnetostriction
magnetovolume properties of $Y_2Fe_{17-x}M_x$ alloys (M=Si or Al) 18
Mechanochemical activation
mechanochemical synthesis of ferroferriborate (vonsenite, Fe_3BO_5) and magnesium ferroferriborate (ludwigite, Fe_2MgBO_5) 55
Melting zone technique
melting zone technique as a tool for a combinatorial approach in material science. I. Application to Al–Co alloys 185
Melt-spinning
spinning phenomena, structure and magnetic properties of Fe–6.5 mass% Si alloy fiber produced by the in-rotating-liquid-spinning process 220
nanostructure and phase distributions in $(Cu_{0.80}Fe_{0.20})_{100-x}B_x$ melt spun ribbons studied by Mössbauer spectroscopy 270
Metal hydride electrodes
studies on cobalt-free AB_5-type hydrogen storage alloys 299
Metal–hydrogen electrode
structure and electrochemical properties of $LaCo_{13-x}Ni_x$ compounds 251
Metastable modification
evidence for an isostructural phase transition in the metastable high-temperature modification of TbPdAl 11
$MgLa_2TiO_6$
phase equilibria, and electrical properties of compounds in the system $MgO–La_2O_3–TiO_2$ at 1200°C 257
$MgO–La_2O_3–TiO_2$ system
phase equilibria, and electrical properties of compounds in the system $MgO–La_2O_3–TiO_2$ at 1200°C 257
Microstructure
X-ray diffraction and microstructural study of PFM precious metal dental alloys under different metallurgical conditions 289
Milling
bonded Sm–Fe–(Ta)–N materials produced via attritor milling and HDDR 265
Mischmetal–Ni alloys
the thermodynamic parameters for the $LaNi_{5-x}Al_x–H_2$ and $MmNi_{5-x}Al_x–H_2$ systems 207
Mixed-valency systems
mechanochemical synthesis of ferroferriborate (vonsenite, Fe_3BO_5) and magnesium ferroferriborate (ludwigite, Fe_2MgBO_5) 55
Mössbauer spectroscopy
Mössbauer study of vacancies in natural pyrrhotite 36
mechanochemical synthesis of ferroferriborate (vonsenite, Fe_3BO_5) and magnesium ferroferriborate (ludwigite, Fe_2MgBO_5) 55
a Mössbauer effect investigation of the Li–Sn system 135
nanostructure and phase distributions in $(Cu_{0.80}Fe_{0.20})_{100-x}B_x$ melt spun ribbons studied by Mössbauer spectroscopy 270

Nanocrystalline material
dislocation pileups in nanocrystalline materials 285
Nanocrystalline materials
high energy ball milling of $(Zr,La)(V,Ni)_{2.25}$ under hydrogen L6
Nanostructured materials
nanostructure and phase distributions in $(Cu_{0.80}Fe_{0.20})_{100-x}B_x$ melt spun ribbons studied by Mössbauer spectroscopy 270
Neodymium germanide
new ordered $ThSi_2$-type derivatives in the light rare earths germanides. Crystal structure of Nd_4Ge_7 168
Neutron diffraction
evidence for an isostructural phase transition in the metastable high-temperature modification of TbPdAl 11
Ni/metal hydride batteries
studies on cobalt-free AB_5-type hydrogen storage alloys 299
Nitride
gaseous interactions with Sm–Fe and Sm–Fe–Ta intermetallic alloys 213
Nontransition metal alloys
regularities of formation of ternary intermetallic compounds. Part 1. Ternary intermetallic compounds between nontransition elements 120

Omega phase
theoretical study of the structural properties and thermodynamic stability of the omega phase in the 4d-transition series 1

Pd-based alloys
X-ray diffraction and microstructural study of PFM precious metal dental alloys under different metallurgical conditions 289
Perovskite
synthesis and high temperature X-ray diffraction studies on the perovskite $SrLaMnRuO_6$ 42
Phase composition
phase composition and crystal structure of $(La_{2-y}Nd_y)_{1-x/2}Sr_{1+x}Cu_2O_6$ $(0\leqslant x\leqslant 1;\ 0\leqslant y\leqslant 2)$ 48
Phase diagram
phase equilibria in the ternary system Pr–Co–B 96
melting zone technique as a tool for a combinatorial approach in material science. I. Application to Al–Co alloys 185
superconducting properties of solid solutions $(Mo_6Se_8)Pb_x$ and $Pb_xMo_6Se_8$ in the ternary system Pb–Mo–Se 260
Phase diagram calculations
phase diagrams of II–VI/III–VI solid solutions with ordering tendencies 233
Phase diagrams
study of the Ag–In–Te ternary system 99
Phase relations
phase equilibria, and electrical properties of compounds in the system $MgO–La_2O_3–TiO_2$ at 1200°C 257
Phase transformation
high-pressure study of titanium carbide 24
Phase transition
synthesis and high temperature X-ray diffraction studies on the perovskite $SrLaMnRuO_6$ 42
Praseodymium cobalt silicides
isothermal section of the phase diagram of the ternary system Co–Pr–Si at 500°C 178
Pr–Co–B
phase equilibria in the ternary system Pr–Co–B 96
Precipitation
δ' precipitation in Al–9.7at%Li alloy using small-angle X-ray scattering 81
Pressure–composition isotherms
hydrogen behavior in the La–Mg–Cu system 66

Quasiternary system
phase diagrams of II–VI/III–VI solid solutions with ordering tendencies 233

Rapid solidification
production process of grain orientation-controlled Fe–6.5 mass% Si alloy fiber using spinning in gas atmosphere followed by winding in rotating liquid 277

Rare earth
synthesis and high temperature X-ray diffraction studies on the perovskite $SrLaMnRuO_6$ 42
Rare earth germanides
new ordered $ThSi_2$-type derivatives in the light rare earths germanides. Crystal structure of Nd_4Ge_7 168
Rare earth intermetallics
crystal and exchange fields in $SmCo_5$ studied by inelastic neutron scattering 28
Rare earth iron compounds
magnetovolume properties of $Y_2Fe_{17-x}M_x$ alloys (M=Si or Al) 18
Rare earth silver aluminides
the compounds $Ln(Ag_{0.7}Al_{0.3})_5$ (Ln–Pr, Nd, Sm) and their crystal structure 181
Rietveld analysis
synthesis and high temperature X-ray diffraction studies on the perovskite $SrLaMnRuO_6$ 42
Rietveld refinement
phase composition and crystal structure of $(La_{2-y}Nd_y)_{1-x/2}Sr_{1+x}Cu_2O_6$ ($0 \leq x \leq 1$; $0 \leq y \leq 2$) 48

Samarium
gaseous interactions with Sm–Fe and Sm–Fe–Ta intermetallic alloys 213
Samarium cobalt
crystal and exchange fields in $SmCo_5$ studied by inelastic neutron scattering 28
Saturation magnetization
formation, structure and magnetic properties of $TbFe_{12-x}Nb_x$ compounds 228
Silver indium tellurides
study of the Ag–In–Te ternary system 99
Single crystal
hexagonal Y_3Ge_5 with a new AlB_2 derivative structure 116
crystal structure of TbCoSi 143
new ordered $ThSi_2$-type derivatives in the light rare earths germanides. Crystal structure of Nd_4Ge_7 168
Site-selective excitation
localization of Eu^{3+} in $KGd_{1.9}Eu_{0.1}F_7$ and $KGd_{1.9}Eu_{0.1}F_{6.97}O_{0.015}$ by site-selective excitation and time-resolved spectroscopy 71
Size distribution
δ' precipitation in Al–9.7at%Li alloy using small-angle X-ray scattering 81
Small-angle scattering
δ' precipitation in Al–9.7at%Li alloy using small-angle X-ray scattering 81
SmFeN
bonded Sm–Fe–(Ta)–N materials produced via attritor milling and HDDR 265
Solid–solid equilibria
study of the Ag–In–Te ternary system 99
Solid solutions
superconducting properties of solid solutions $(\overline{Mo_6Se_8})Pb_x$ and $Pb_xMo_6Se_8$ in the ternary system Pb–Mo–Se 260
Spin reorientation
formation, structure and magnetic properties of $TbFe_{12-x}Nb_x$ compounds 228
Structural phase transition
evidence for an isostructural phase transition in the metastable high-temperature modification of TbPdAl 11
Structural stability
theoretical study of the structural properties and thermodynamic stability of the omega phase in the 4d-transition series 1
Structure determination
crystal structure of TbCoSi 143
the compounds $Ln(Ag_{0.7}Al_{0.3})_5$ (Ln–Pr, Nd, Sm) and their crystal structure 181
Sulfides
Mössbauer study of vacancies in natural pyrrhotite 36
Superconductivity
phase composition and crystal structure of $(La_{2-y}Nd_y)_{1-x/2}Sr_{1+x}Cu_2O_6$ ($0 \leq x \leq 1$; $0 \leq y \leq 2$) 48
superconducting properties of solid solutions $(\overline{Mo_6Se_8})Pb_x$ and $Pb_xMo_6Se_8$ in the ternary system Pb–Mo–Se 260

Ta
bonded Sm–Fe–(Ta)–N materials produced via attritor milling and HDDR 265
Terbium cobalt silicide
crystal structure of TbCoSi 143
Terbium iron compounds
formation, structure and magnetic properties of $TbFe_{12-x}Nb_x$ compounds 228
Terbium palladium aluminide
evidence for an isostructural phase transition in the metastable high-temperature modification of TbPdAl 11
Ternary germanides
new ternary compounds with CeFeSi-type structure (LuTiSi, LuTiGe) and CeScSi-type structure (ZrVGe and HfVGe) L10
Ternary intermetallic compounds
regularities of formation of ternary intermetallic compounds. Part 1. Ternary intermetallic compounds between nontransition elements 120
regularities of formation of ternary intermetallic compounds. Part 2. Ternary compounds between transition elements 126
regularities of formation of ternary intermetallic compounds. Part 3. Ternary compounds between one nontransition element and two transition elements 131
new ternary compounds with CeFeSi-type structure (LuTiSi, LuTiGe) and CeScSi-type structure (ZrVGe and HfVGe) L10
Ternary rare earth compound
crystal structure of TbCoSi 143
Ternary rare earth compounds
formation, structure and magnetic properties of $TbFe_{12-x}Nb_x$ compounds 228
Ternary section
isothermal section of the phase diagram of the ternary system Co–Pr–Si at 500°C 178
Ternary silicides
new ternary compounds with CeFeSi-type structure (LuTiSi, LuTiGe) and CeScSi-type structure (ZrVGe and HfVGe) L10
Ternary systems
study of the Ag–In–Te ternary system 99
Thermal analysis
hydrogen behavior in the La–Mg–Cu system 66
Thermal expansion
magnetovolume properties of $Y_2Fe_{17-x}M_x$ alloys (M=Si or Al) 18
Thermodynamic properties
thermodynamic assessment of the Cu–La system 88
Ti_3Al
highly oriented hexagonal hydride phase formation in single phase Ti_3Al by cathodic charging L1
TiC
high-pressure study of titanium carbide 24
Time-resolved spectroscopy
localization of Eu^{3+} in $KGd_{1.9}Eu_{0.1}F_7$ and $KGd_{1.9}Eu_{0.1}F_{6.97}O_{0.015}$ by site-selective excitation and time-resolved spectroscopy 71
Ti–Zr–Cr–V alloys
hydrogen storage characteristics of Ti–Zr–Cr–V alloys 244
Transition element systems
regularities of formation of ternary intermetallic compounds. Part 2. Ternary compounds between transition elements 126

T–T′–M systems
regularities of formation of ternary intermetallic compounds. Part 3. Ternary compounds between one nontransition element and two transition elements 131

Unidirectional dendritic growth
spinning phenomena, structure and magnetic properties of Fe–6.5 mass% Si alloy fiber produced by the in-rotating-liquid-spinning process 220
production process of grain orientation-controlled Fe–6.5 mass% Si alloy fiber using spinning in gas atmosphere followed by winding in rotating liquid 277
Uranium copper stannide
crystal structure of the heavy-fermion compound UCu_5Sn 32

X-ray diffraction
hydrogen behavior in the La–Mg–Cu system 66
the compounds $Ln(Ag_{0.7}Al_{0.3})_5$ (Ln–Pr, Nd, Sm) and their crystal structure 181
X-ray diffraction and microstructural study of PFM precious metal dental alloys under different metallurgical conditions 289
X-ray single crystal analysis
crystal structure of the heavy-fermion compound UCu_5Sn 32

Yttrium germanide
hexagonal Y_3Ge_5 with a new AlB_2 derivative structure 116

Zero magnetostriction alloys
spinning phenomena, structure and magnetic properties of Fe–6.5 mass% Si alloy fiber produced by the in-rotating-liquid-spinning process 220
production process of grain orientation-controlled Fe–6.5 mass% Si alloy fiber using spinning in gas atmosphere followed by winding in rotating liquid 277
$ZrCr_2$ phase
hydrogen storage characteristics of Ti–Zr–Cr–V alloys 244
ZrV_2-type alloys
high energy ball milling of $(Zr,La)(V,Ni)_{2.25}$ under hydrogen L6
